

■ SPECTRAL
making technology invisible

AMENO 2014

Home

at last

FINALLY TIME FOR FINE ENTERTAINMENT.

For some, the greatest thing is browsing through an old record collection with a good glass of wine. Whilst others look forward to a fun filled afternoon of games with a console. Or streaming a slide show of holiday photographs from an iPad to a new television set.

And still others love to relax on the couch and take in a good movie.

We have technology to thank for many great moments, but does the entire living room have to be packed with technology?

Do away with loudspeakers, cable chaos, that bulky sub-woofer and amplifiers scattered about your living room. A home for the iPad and other devices would be handy.

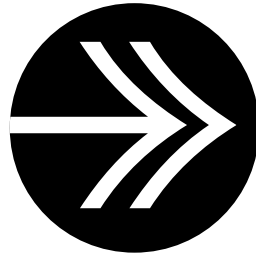

NO TECHNOLOGY. JUST PURE ENTERTAINMENT.

As entertainment furniture specialist, that's exactly the task we have made our business: bringing together better living and entertainment technology.

■ SPECTRAL
making technology invisible

Ameno is

for
all
generations
of
technology

**THE CUSTOMISABLE HOME FURNITURE SYSTEM
WITH FUTURE-PROOF DESIGN.**

Ameno offers all the capabilities of a full-fledged modular furniture system. All units are vertically and horizontally stackable as well as expandable. The individually designed surfaces, means they can be flexibly adapted to match all colour, material and technology trends.

Technically, the system is prepared for everything that was, that is and that will be on the market. The system looks forward to offering a home to your Technics turntable from 1980 as well as your new tablet, 3D TV and even to the iPhone 6 not yet available.

It is all possible with the heart of Ameno: the backbone. A flexible cable compartment for all cables, power strips, the rotatable television mount and docking solutions for Samsung and Apple mobile devices.

THAT WAY YOU CAN RELAX.

Because Ameno does everything for you. It adapts to your lifestyle. It can be as modern as you wish. Retro today, futuristic tomorrow? Or both at the same time.

Ameno offers just as much variety as your life ...

Ameno is

a cineastic
experience

**REAL OOMPH UNDER THE HOOD. THANKS TO
A 2.57 METRE SOUND SYSTEM.**

We associate great moments in our lives with
music and movies.

What song was playing during that first kiss?

What was your first movie?

Memorable moments that have placed their mark
on life. Now you can experience it all once more.

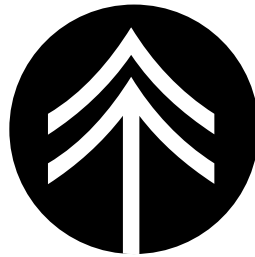

At home in your living room. In unbelievable
home cinema quality and an elegant look.

No cables

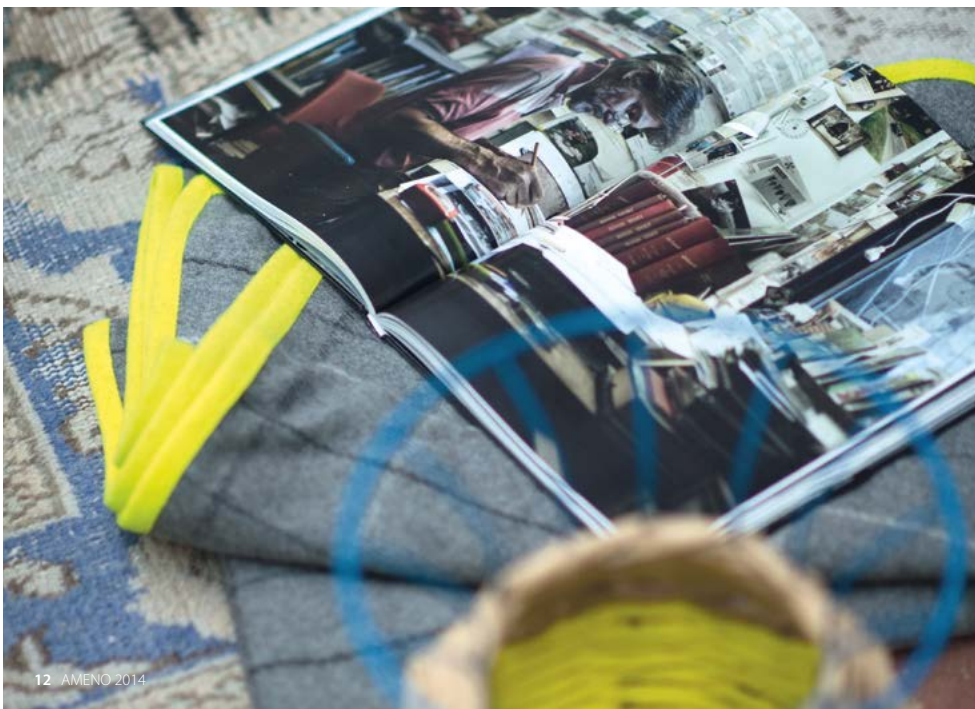

No loudspeakers scattered about

**FOR PEOPLE
WHO PREFER TO HEAR LOUDSPEAKERS,
NOT SEE THEM.**

With Ameno, the speakers are invisibly integrated in the furniture. They produce an incomparably rich surround sound without all those cables scattered around .

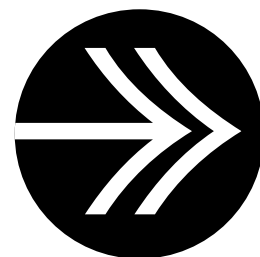

AND THE AMPLIFIER AND SUBWOOFER ?

Both are integrated in the sound system. So that they, too, are hidden out of sight.

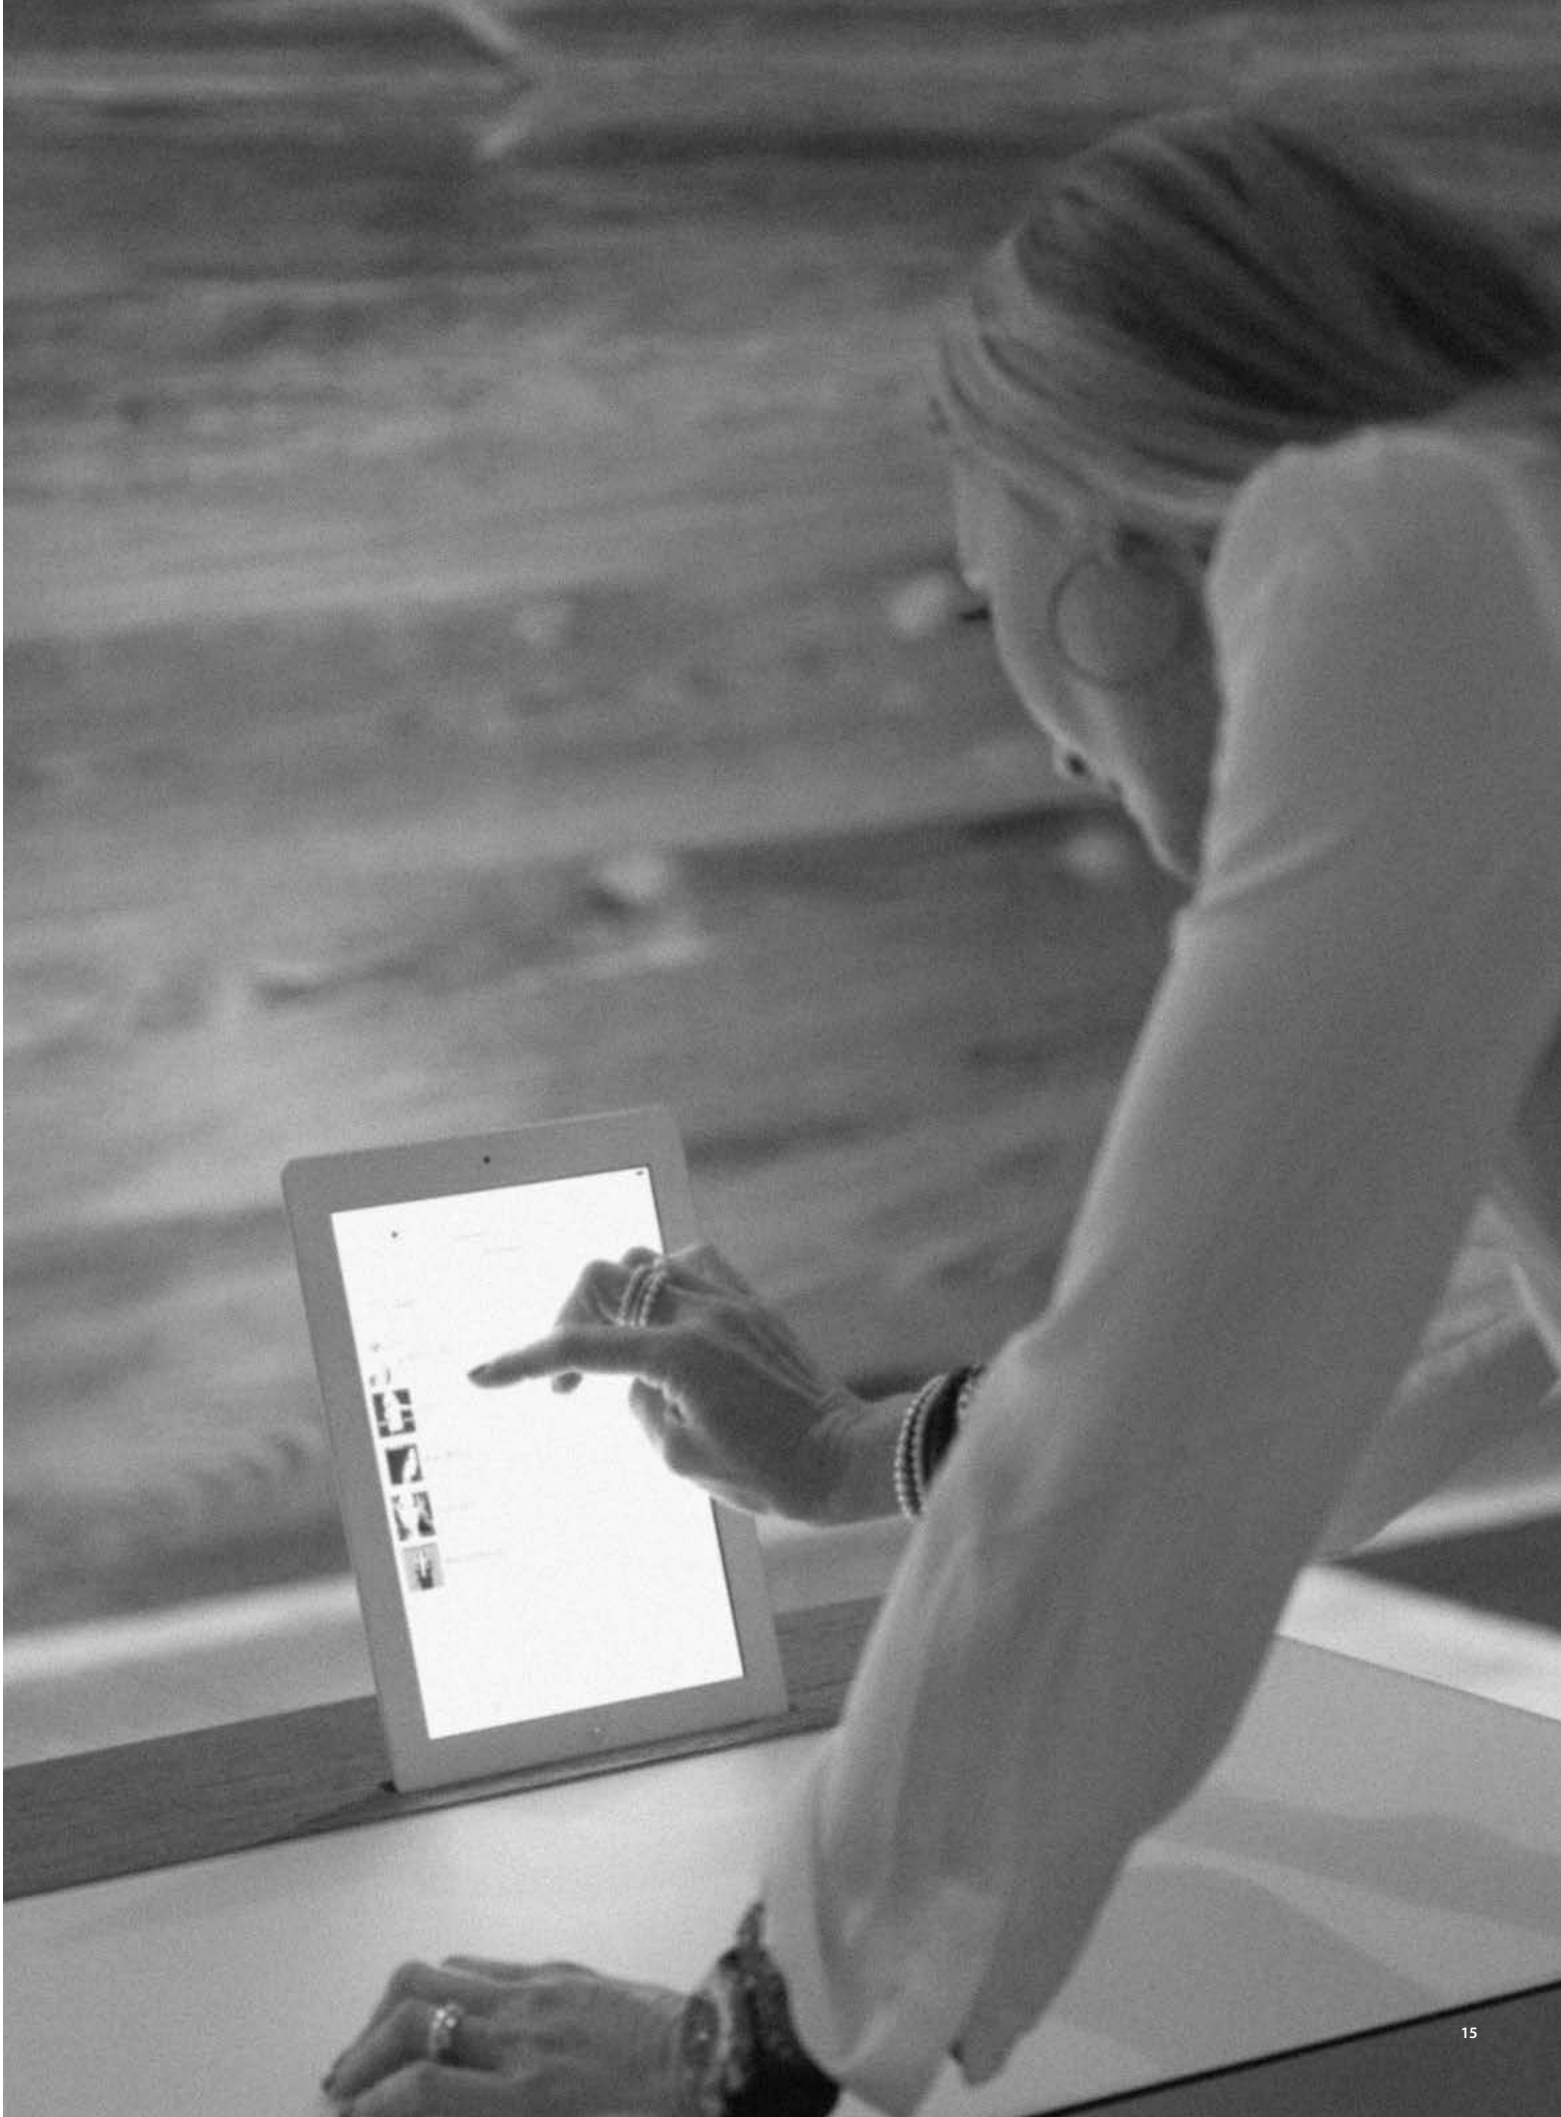

How can I stream music, pictures and videos to my television set and sound system?

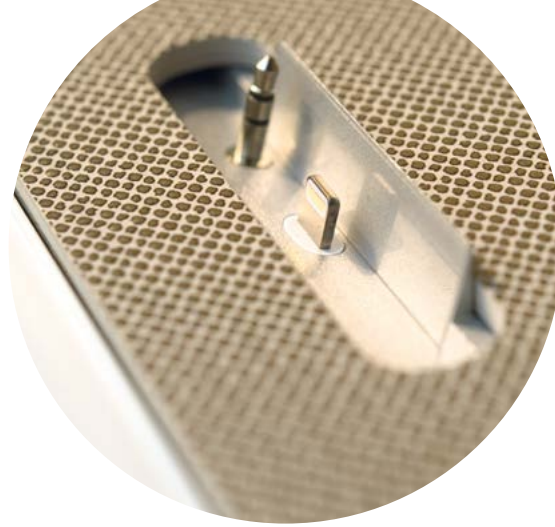

UNABLE TO FIND A CHARGER?

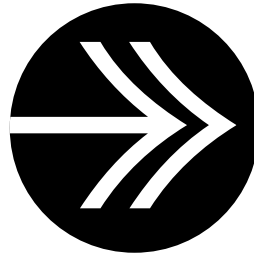

No worries, iPhone and other mobile devices can be automatically charged. Without all the cable chaos.

Interchangeable

Future-proof

**NEVER HAVE ANOTHER WORRY AGAIN
WHEN IT COMES TO NEW TECHNOLOGY.**

Ameno is also available with a docking station for iPhone, Ipod, iPad and Samsung Galaxy. The docks and accompanying cables are located under the furniture's top panel. Mobile devices can be simply inserted from the top and are thus directly connected to the TV and sound system. This enables you to stream music, pictures and videos to the television or sound system directly. The dock also functions as a hidden charging station so there are no cables scattered about.

USE DIFFERENT APPLE DEVICES?

Attachable adapters are available for use with several Apple devices simultaneously or upgrading from the iPhone 4 to the iPhone 5 with no problem. That way mum can plug in her iPhone 4, dad can charge his iPhone 5 and their little girl can listen to music on her iPad Mini. And there's also room for the family classic iPod Touch.

Spectral docks and adapters are developed further on a regular basis. All current docking solutions can be at spectral.eu/de/dockfinder

Ameno is

Architecture

RETHOUGHT. FREEDOM IN PLANNING.
CREATING SPACE. DIVIDING UP SPACE.

Each piece of furniture has its sweet side.
The free-standing version of Ameno has two.
For best entertainment, there's the side
with the sound system. For peace and quiet,
there's also a customisable back side.

For all generations of technology

**OUTLET, APPLE TV, POWER SUPPLY, DOCK FOR MOBILE DEVICES
AND EVERYTHING ELSE ...**

Cables, cables and even more cables.

Those unsightly things are hanging everywhere you look. A horror, no doubt. Quick fix: simply remove the magnetic covering from the equipment section plug in the USB cable, power supply or whatever else and replace the cover. Presto, everything is now nice and tidy. Thanks, Ameno.

It is all possible with the heart of Ameno: the backbone made of high-strength aluminium. A cable compartment that is flexible to use, divide and easily accessible. The overlying cover can also be individually designed like the furniture itself.

FUTURE-PROOF.

And should you wish to insert your iPhone in addition to your iPad in future: no problem. Just insert an additional dock and replace the cover. By the way, it takes less than two minutes.

SPACE FOR DEVICES

Ameno is

the first furniture with a backbone

MOBILE DEVICE INTEGRATION

HIDDEN SPEAKERS

ELEGANT WIRING

Ameno is

everything rolled into one

A SMALL BOOKSHELF, A SOUND SYSTEM, A ROTATABLE TELEVISION STAND, SPACE COMPARTMENT, AND ROOM FOR HOOVERING.

A bit of art on the shelf, favourite books always in view.
A little storage space above a little bit to the sides.
And everything floating nicely, the wall cabinets arranged like waves.
What you can do, when you have the opportunity to ...

Agfa Isoly-Mat, 1960, Made in Germany

Flashdance, 1983

Ameno is

Hi-Fi

MY NEW AND OLD
MUSIC COLLECTION NEXT TO EACH OTHER.

My vinyl records. Bought with my own pocket money
How long ago was that? An eternity. Everything Counts
by Depeche Mode, Mammagamma by Alan Parsons.
"Hi Technics SL-1210 MK2, look what I've got for you!" It's
crackling with enjoyment. I am too. I've got gooseflesh

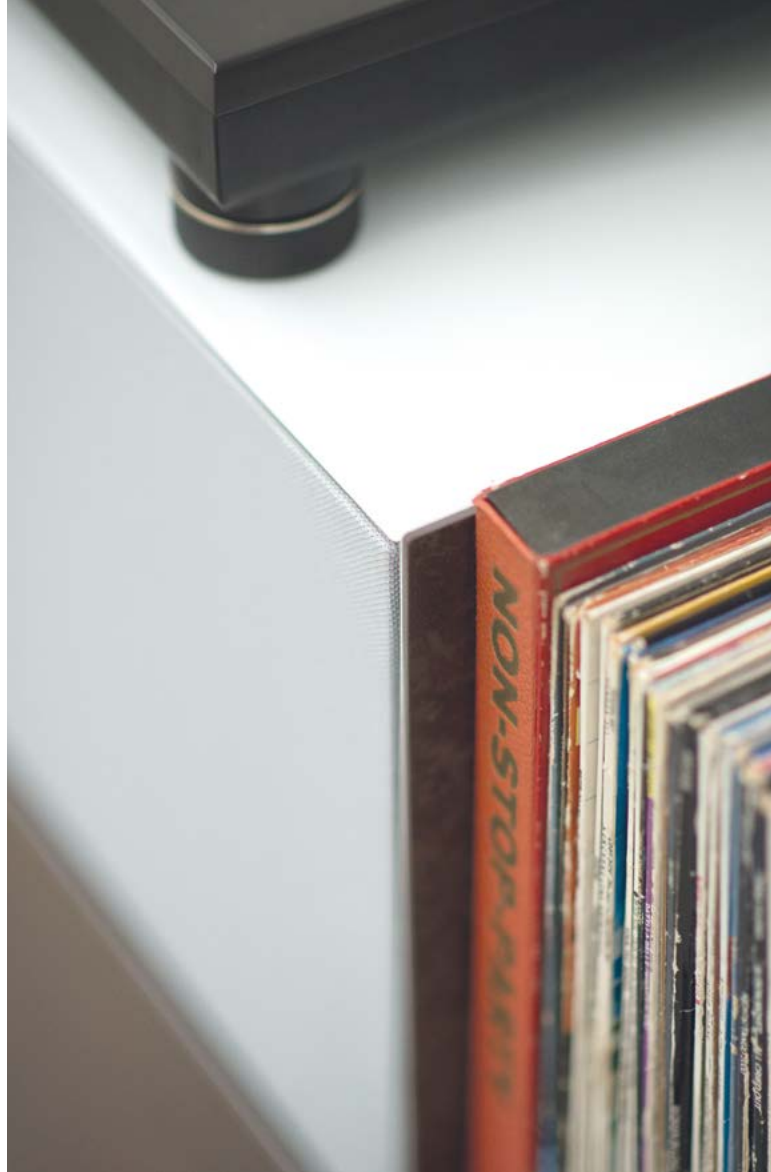

Technics SL-1210 MK2, Made in Japan

Ameno is

cosy

**HOME CINEMA AND BETTER
LIVING PERFECTLY IN TUNE.**

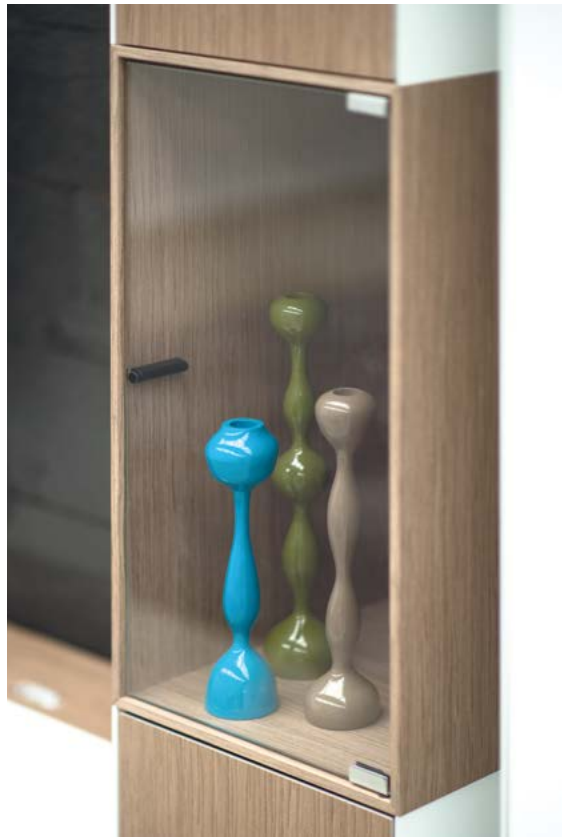

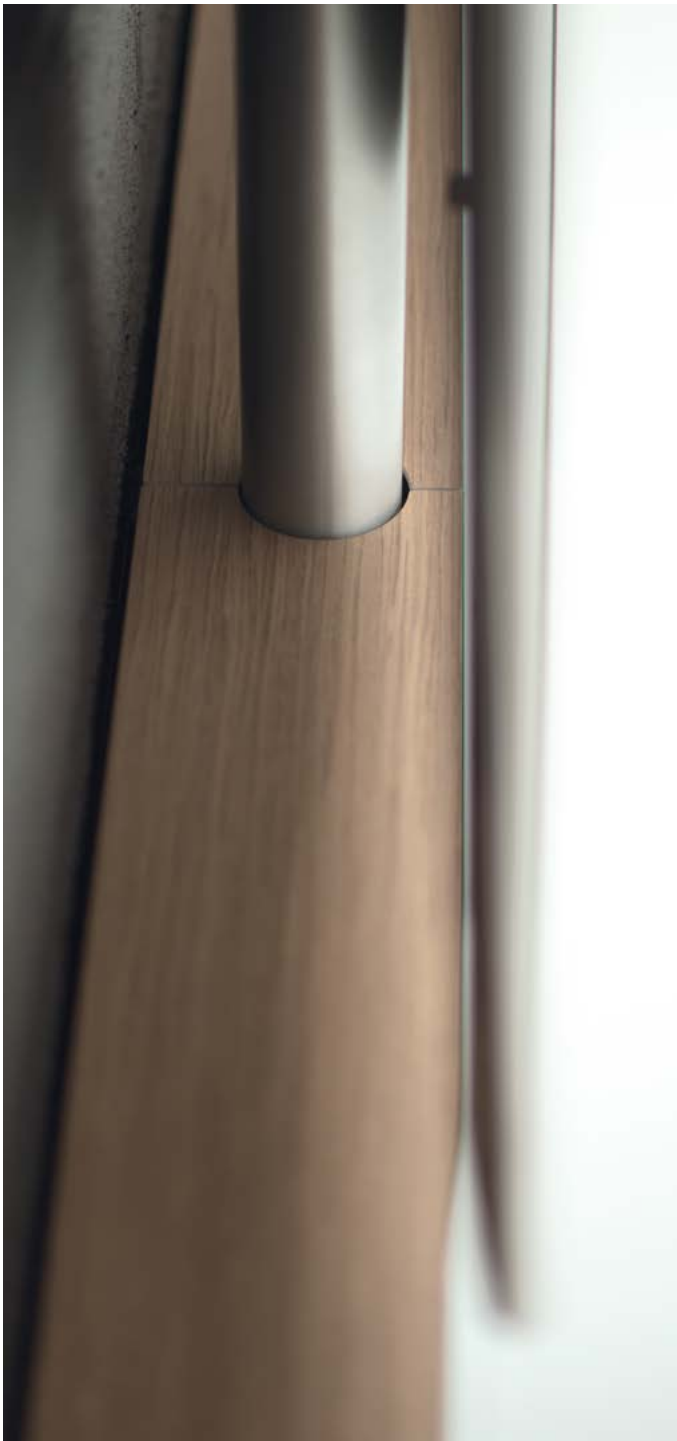

The Ameno home cinema
components are completely hidden.

So you can focus entirely on
setting things up, decorating and
living. And impressing your
guests when they stop by for a visit

Touring version of the Swabian-made sports car, 1970

Ameno is

majestic

LIKE LIVING IN A CATHEDRAL.

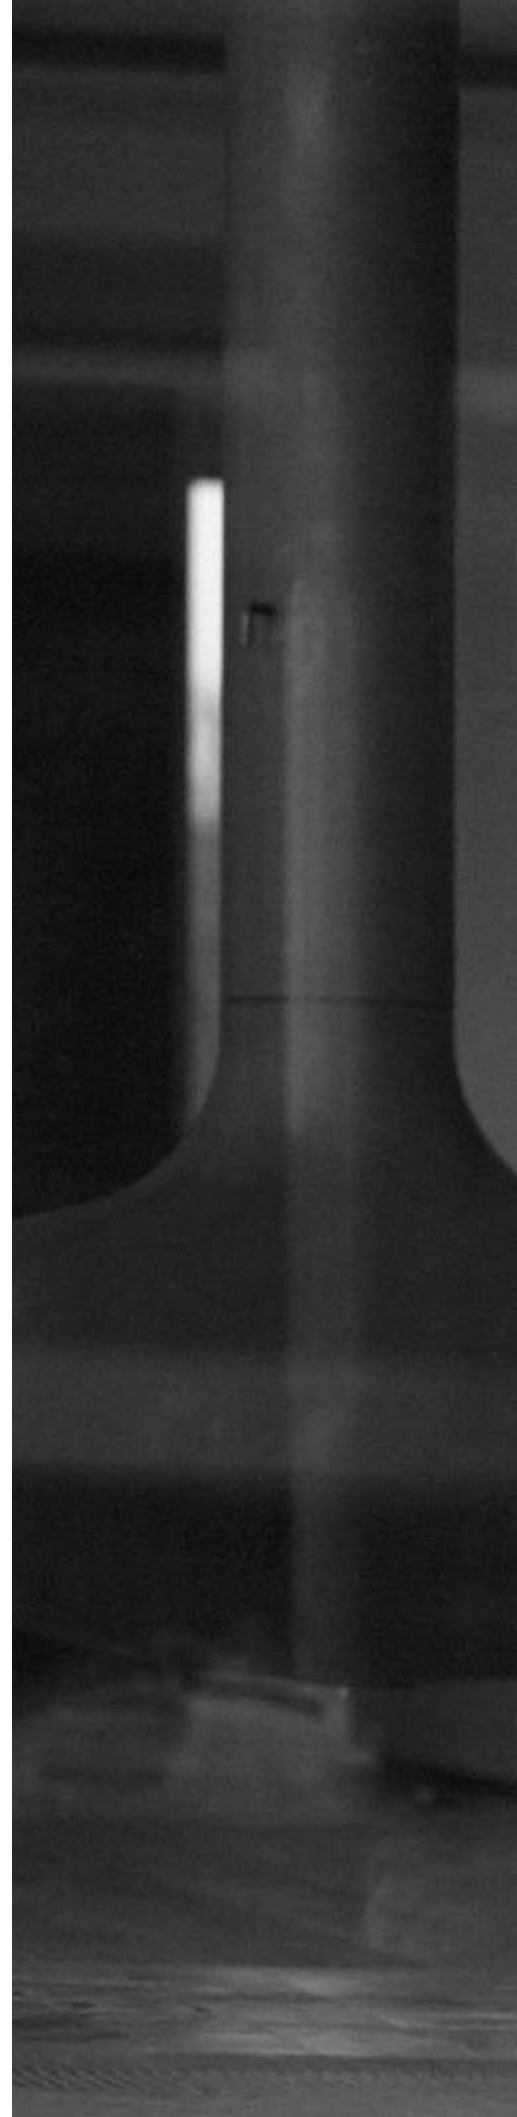

Most days are chock full of hustle and bustle, noise as well as stress.
No time for peace and quiet. There's nothing like coming home.
Shut the doors. Hi elegance and quality.

Ameno is

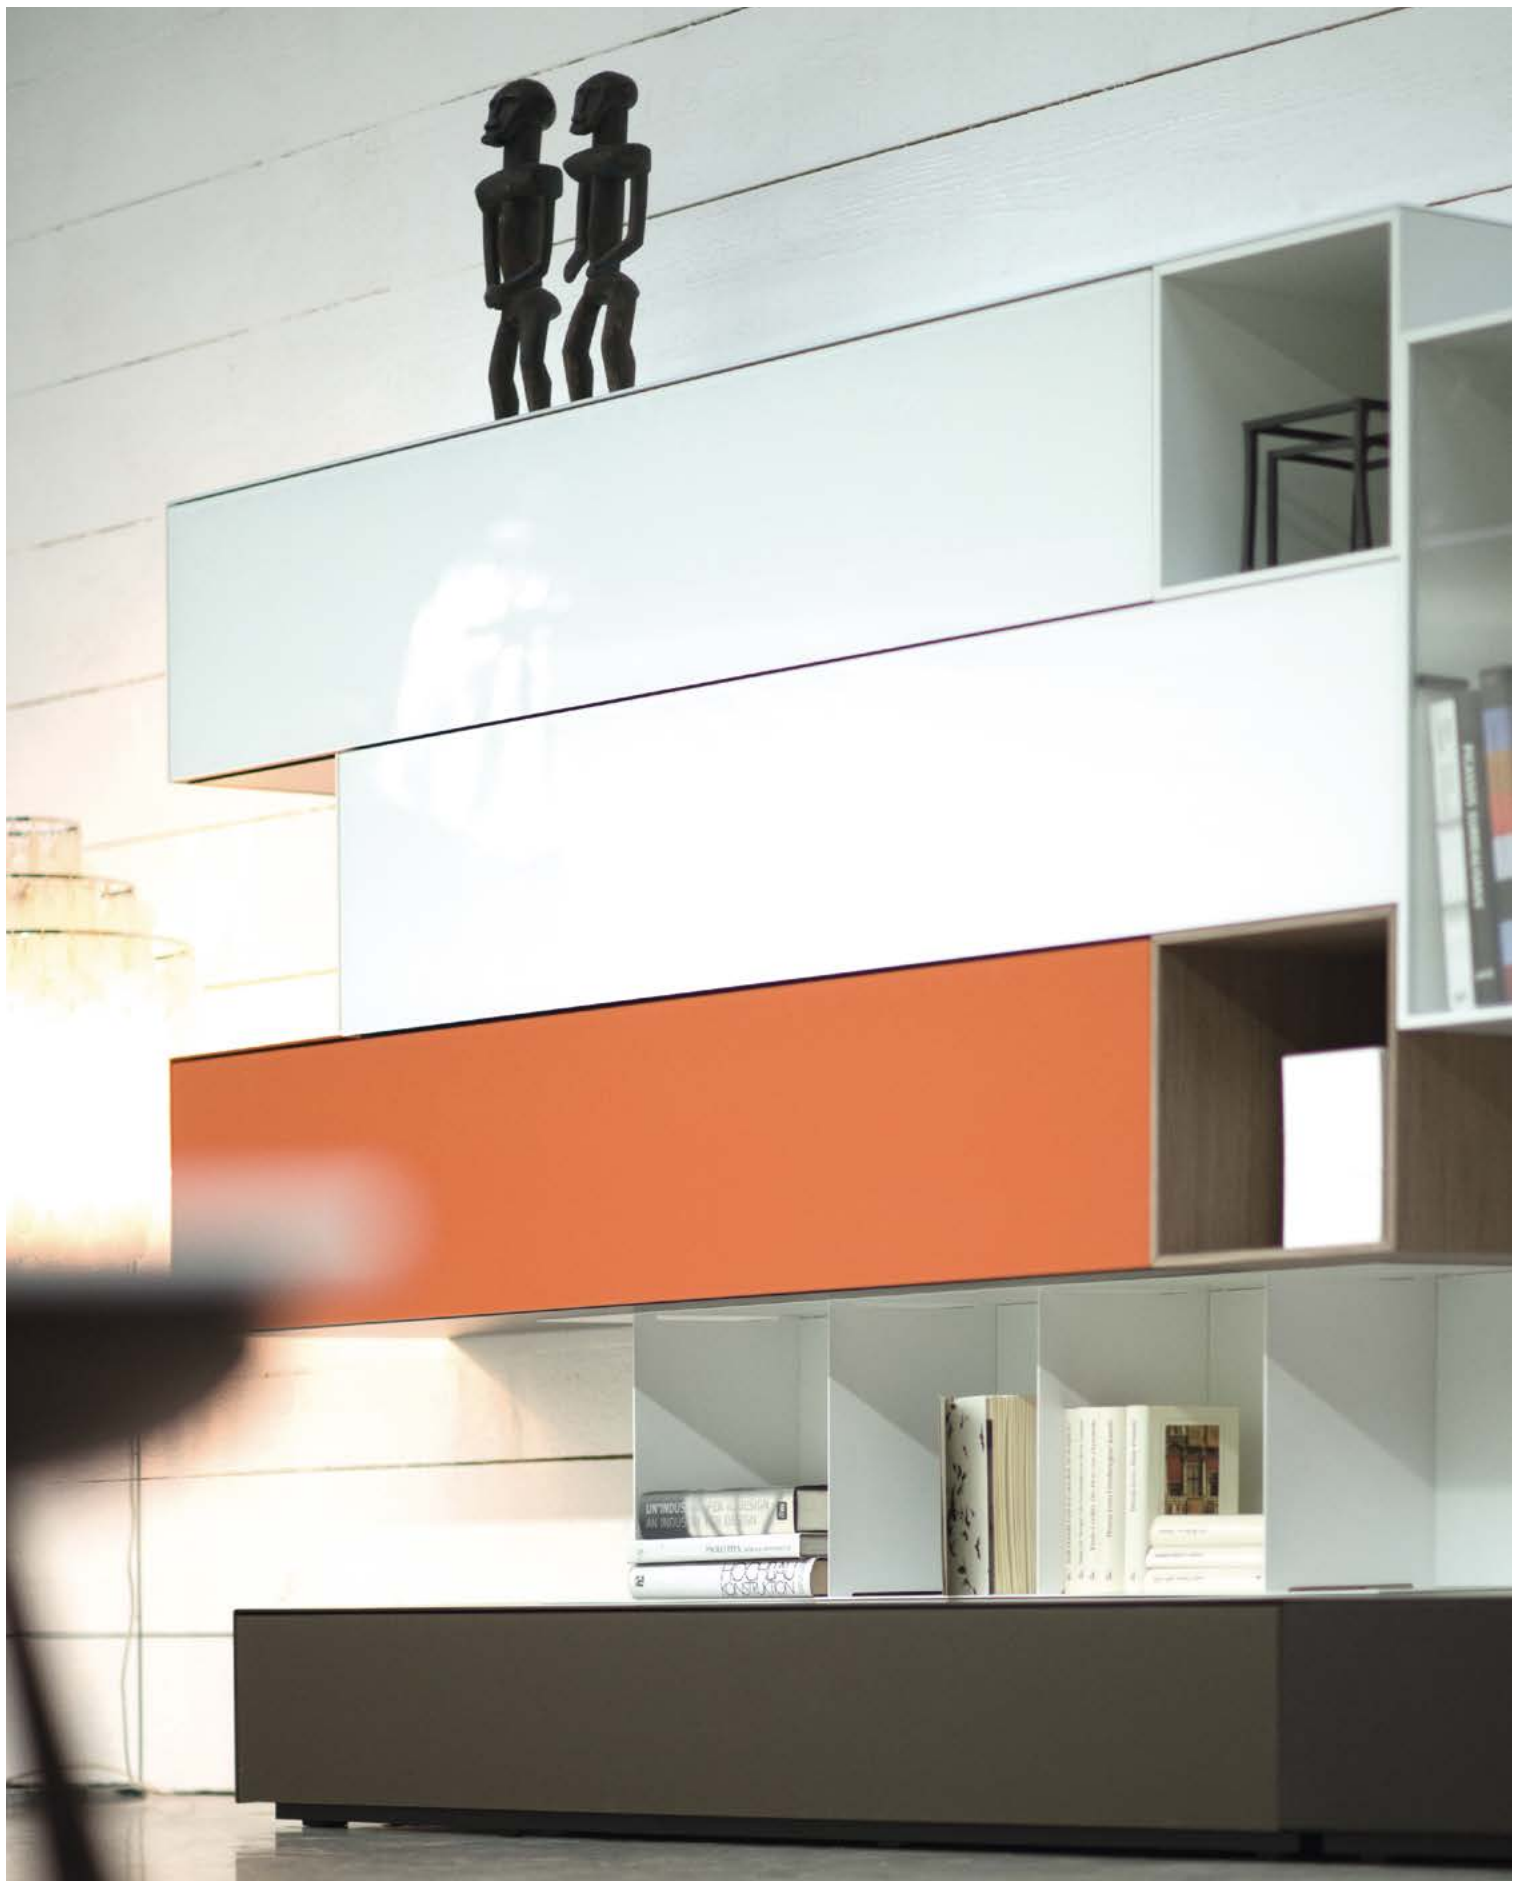

impressive

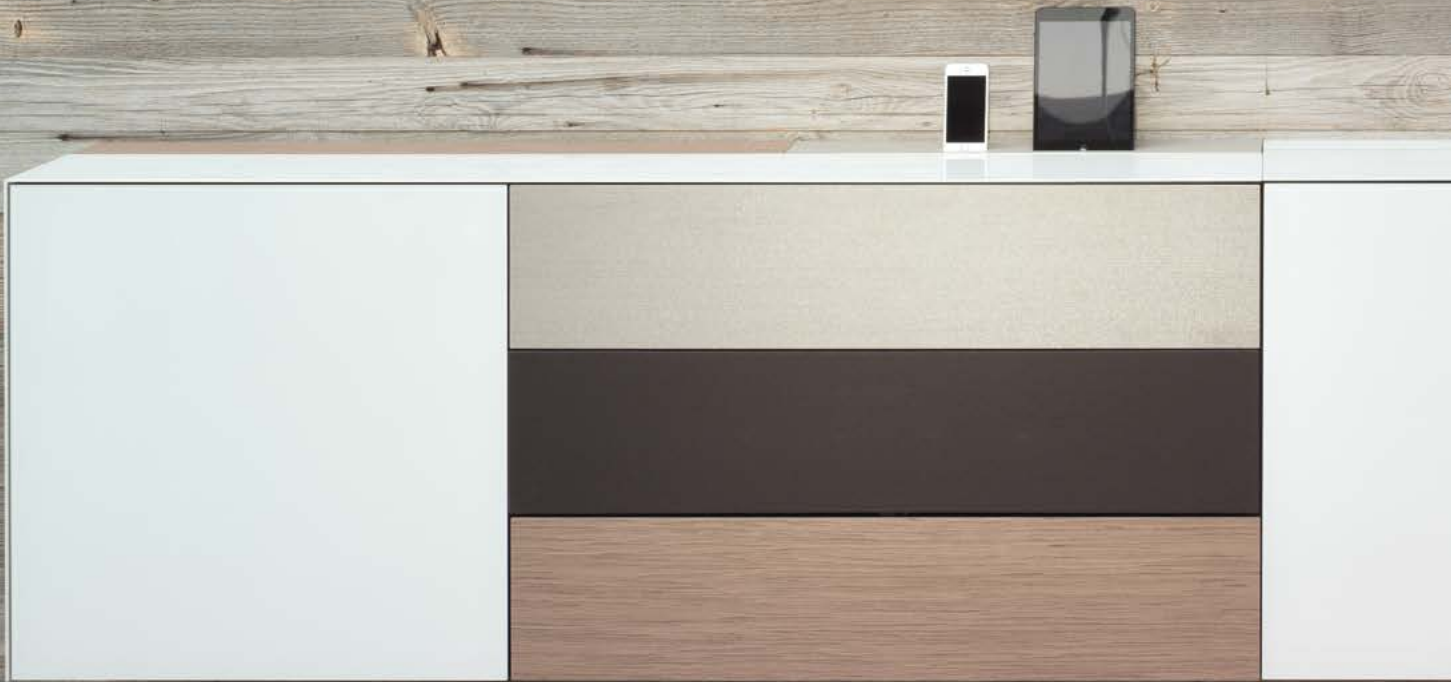

**ONE FURNITURE UNIT AS FAR AS THE EYE CAN SEE.
FOR DREAMING AND PURE ENJOYMENT.**

The sound that emanates from a Spectral VRA sound system cannot be described by words. Canton speaks of itself as being by far the best front surround sound system in the world. At least its the most beautiful front surround sound system in the world to us.

Ameno is

magic

EVERYTHING NEEDS TO BE OUT OF SIGHT.

Reading a good book while listening to fantastic music is a great thing. And what is the iPhone or iPad doing while it plays music? That's right, it's charging.

And speaking of magic:
Where is that sound system hiding?

The heart of Ameno: the backbone made of high-strength aluminium.
A cable compartment that is flexible to use, divide and easily accessible.
The overlying cover can also be individually designed like the furniture itself.

Ameno is

colourful

**SOME THINGS HAVE A CERTAIN SHAPE,
AND SOME A CERTAIN COLOUR.**

You don't see a silver Ducati too often. It's all a matter of luck finding one. Silver, blue, white lettering. A mix of colours just as captivating as the machine itself. Paul Smart won the 200 miles of Imola in 1972 with this paint job.

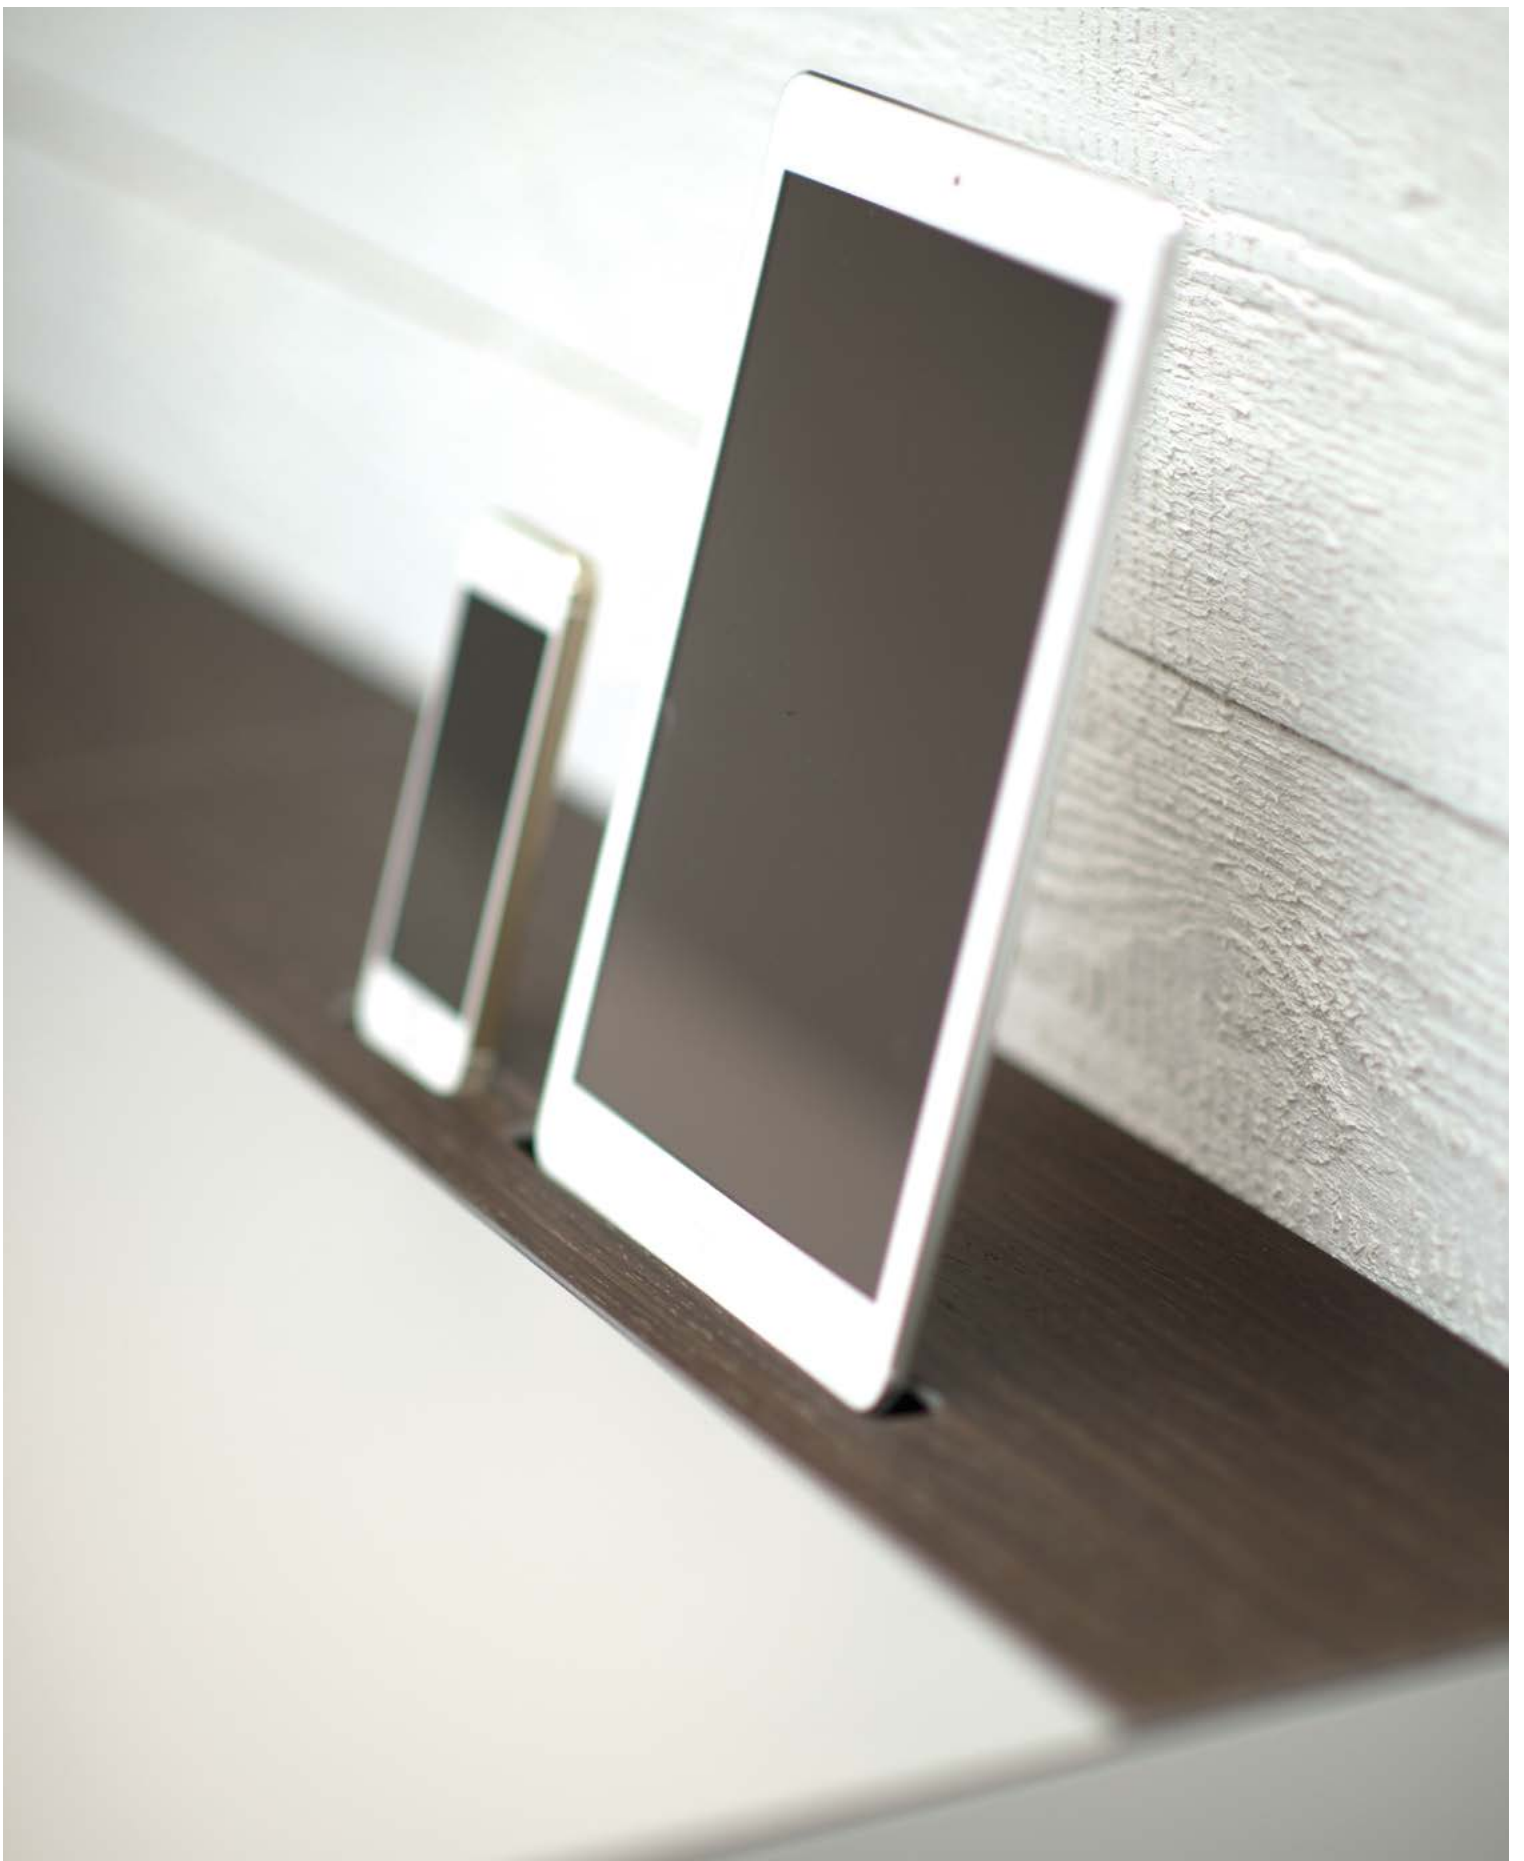

Ameno is available in this exact colour combination.
Or in 2,000 other colours.

Ducati DM450, 1976, Made in Italy

Ameno is

unrivalled sound

**VIRTUAL SURROUND SOUND?
SOUND COMPLICATED?
NO, SOUNDS FANTASTIC.**

The left and right speakers and subwoofer (2.1) are incorporated in a single speaker unit. With the help of advanced sound processing, your ear perceives a surround effect without requiring five speakers and a sub-woofers as you do with a regular (5.1) surround system. Thanks to the DTS® Tru-Surround technology there is no need for walls or other reflective surfaces.

BENEFITS:

- No loudspeakers scattered about and no visible cables
- Integrated subwoofer and amplifier
- Integrated RDS Radio (BRA1, VRA1)
- Programmable universal remote for controlling other devices (BRA1, VRA1)
- furniture can be placed anywhere within the room
- ultra low heat generation thanks to the digital amplifier
- perfectly matched components

SOUND AND PRAISE FROM ALL SIDES.

A WIDE SELECTION OF SOUND MODES:

The sound systems have special programmes for sophisticated music enjoyment in stereo and two surround modes for movies and live concerts. Everything can simply be switched by remote control.

CHOICE OF 3 SOUND SYSTEMS:

GOOD: SCA3

Completely baffled by the voluminous sound that the SCA3 produces, we double-checked for safety's sake if there really were any other speakers or subwoofers running. Even in terms of performance, the "little" sound system showed impressive results in our big test room. Great effects, clearly understandable dialogues and a bass you can actually feel, we truly enjoyed how it played "Skyfall". The integrated Bluetooth 4.0 interface allows wireless music streaming from virtually any mobile device.

BETTER: BRA1

Our best-seller Enormously strong and stable surround sound system volume level that can be adjusted to acoustically difficult spaces, thanks to an advanced signal processor. For those who really want a home entertainment system from a one-box solution in the living room, the BRA1 is the best alternative.

BEST: VRA1

2.57 metre uncompromising performance in stereo and surround sound. Sounds exciting lively and harmonious. Bass and base tones work hand in hand to offer a fantastic sound experience.

Put simply: the best front surround system money can buy.

CANTON®
German loudspeaker tradition

Ameno is

strong

YOU'VE GOT TO BE MAD IF YOU GO MAD PLACING HEAVY OBJECTS ON FURNITURE.

Furniture are items for personal use. You use them for this and that. And quite often people place objects on it. And you move them about a bit.

AHHHHH ... SCRATCHED SURFACE?

No worries. The Ameno glass surfaces are many times harder than traditionally coated furniture surfaces. The ceramic surface is even harder, and virtually scratch-resistant. Just as it should be.

Anything else would simply be mad, right?

Ameno is

ceramic

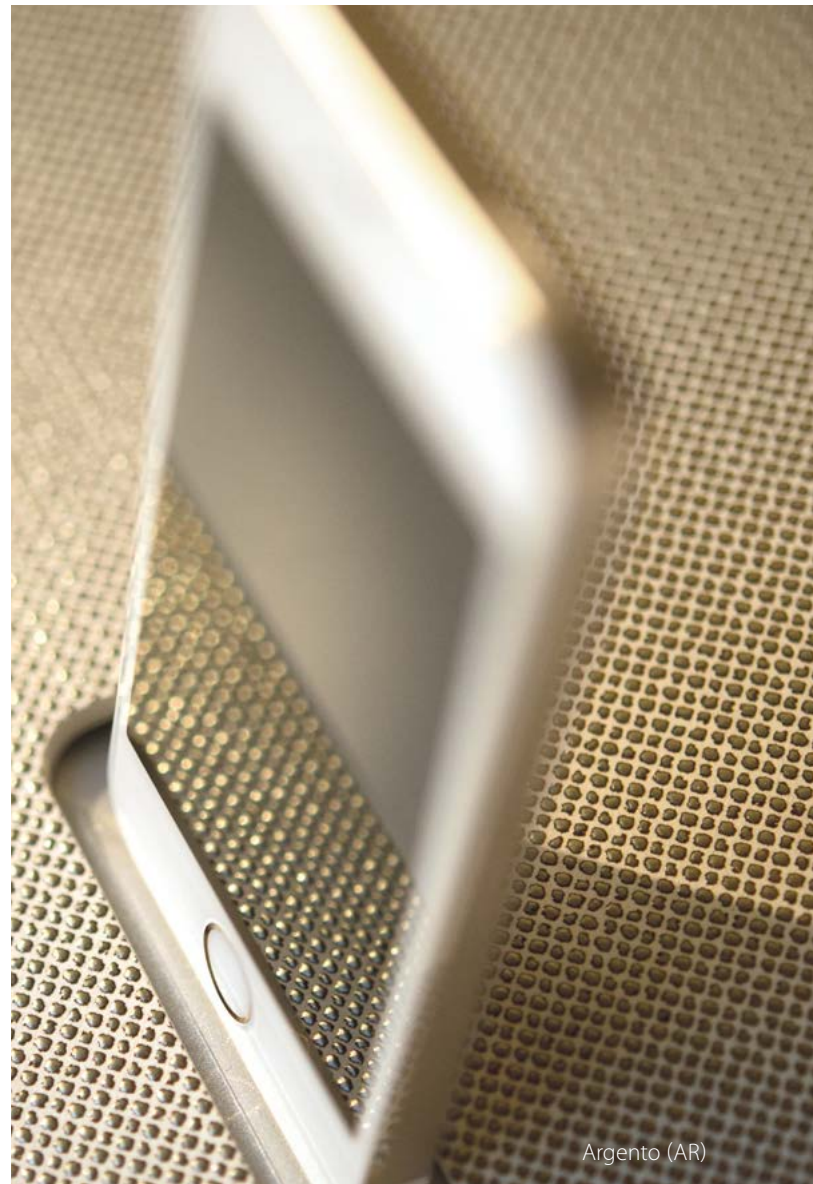

**VIRTUALLY SCRATCH-RESISTANT
AND UNBELIEVABLY ELEGANT.**

Tough and a homely appearance seem to be opposites. But not with Ameno. The ceramic surfaces feature a natural texture and a harmonious colour scheme. That means they provide viewers with a moving visual and haptic experience.

A gold iPhone makes for a real eye-catcher on a matching surface.

Bianco (BI)

Argento (AR)

Nero (NE)

Ameno is

anything you want it to be

WE KNOW THAT SOME COLOURS ARE MORE POPULAR THAN OTHERS. OUT OF THE OTHER 2,000, WE KNOW THAT THERE ARE MANY FAVOURITE COLOURS WAITING TO BE DISCOVERED.

COLOURS FOR GLASS SURFACES

Spectral glass surfaces are coated on the bottom. The result is a brilliant colour depth and an extremely scratch-resistant surface. A selection of standard colours are available (right side) as well as over 2,000 NCS optional colours which can be chosen from a colour fan.

SATINISED OR GLOSSY SURFACE?

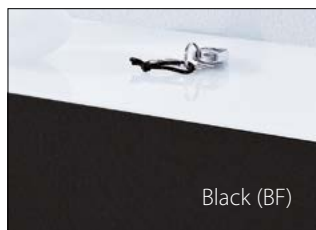

You can choose from a satinised (matte) or glossy surface.

LIKE A COLOUR SAMPLE?

No problem! We will be more than happy to make you a sample* on request. That way you can be quite sure how your favourite colour looks.

COLOURS FOR FABRIC FRONTS (SPEAKER COVER)

Fabric front covers are available in Black (BF), Silver (SF) and Carbon (CF).

Snow (SNG)

Silver (SV)

Black (BG)

Toop (TP20)

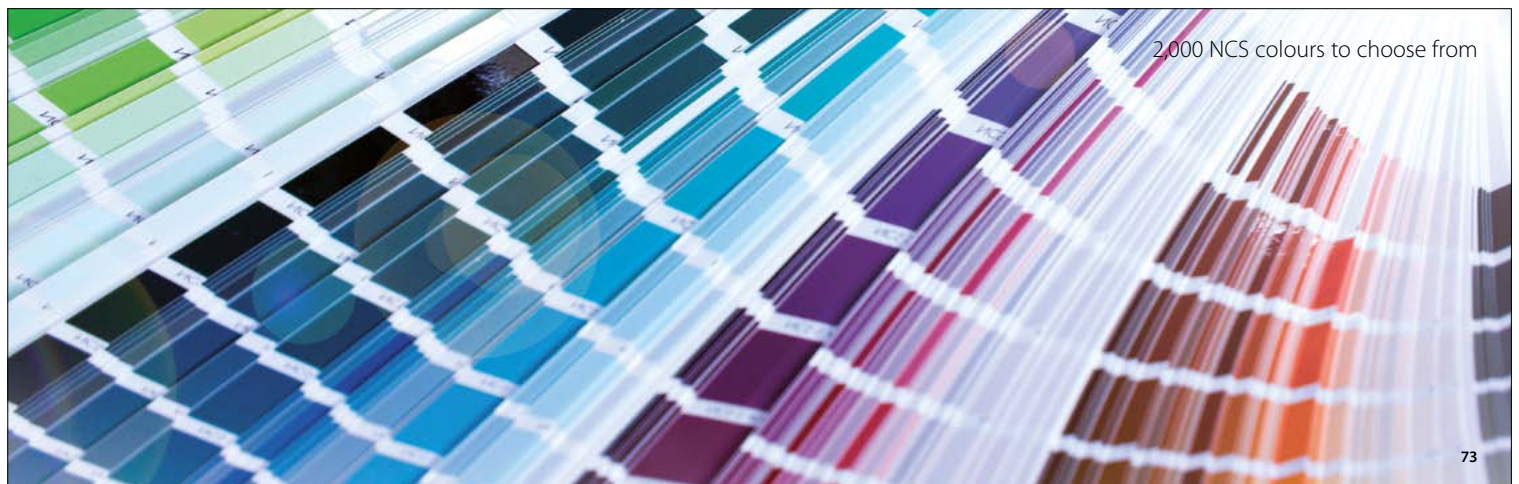

Toop35 (TP35)

Toop50 (TP50)

2,000 NCS colours to choose from

Ameno is

made from not your average wood

**A WORLD'S FIRST:
WOOD WITH ALUMINIUM CORE.**

The cabinet frames and fronts are have an outer layer that is 4 mm thin. This cover forms the surface of Ameno, giving the furniture its unmistakable elegance.

With traditional methods, 4 mm wooden cover layers cannot be made to be warp-free and sturdy. That is why they have been made with a sturdy aluminium core for Ameno. The wood veneers are laminated wafer-thin from both sides on to the aluminium core.

The wooden covers are cut using a water jet. This method offers unrivalled precision and an elegant shiny edge.

VARIATION: ALUMINIUM SURFACE.

The aluminium outer layer is made from ALUCOBOND®, a bonded panel consisting of two anodized aluminium with a black synthetic core. This surface is extremely durable and resistant.

Indian Walnut (IW)

Dark Oak (DO)

AMENO IS A COMPLETE AND FUTURE-PROOF ENTERTAINMENT FURNITURE SYSTEM

THE HEART: THE BACKBONE.

Ameno has a cable compartment made of high-strength aluminium that is flexible to use, divide and easily accessible. The cable compartment gives Ameno its stability and offers space for power supply and all other cables.

THE EQUIPMENT SECTION.

The surface of Ameno is divided into equipment sections. Media equipment is separate from classic storage space ones. This creates a flexible, easily accessible and customisable surface. Dividing up the surfaces creates completely new design possibilities. The covers can be combined using different materials. The result is a customisable surface.

FUTURE-PROOF.

The upgradable mobile device interface makes Ameno future-proof. Should you want to dock your new iPhone along with your iPad, no problem. Simply insert an additional dock and change the cover. By the way, it takes less than two minutes. Spectral develops new docks for current Apple and Samsung mobile devices on a regular basis.

THE STRUCTURAL BASE.

Cabinet frames are available in two depth sizes and many widths and heights that can be arranged vertically and horizontally as desired. You can arrange the fronts of the cabinet frame to match your taste. The fronts are handleless and operated by touch system. Electric-powered drawers are optionally available.

HIDDEN SOUND.

There are three premium sound systems to choose from, making for the perfect solution for all tastes. All systems are integrated into the furniture and hidden from view.

360° UNIVERSAL TV MOUNT.

Almost all commercially available TV sets can be mounted on the rotatable universal TV mount. The cables are run in the column hidden from view. The mount is rotatable up to 360° enabling you to watch movies from every angle.

WALL ELEMENTS.

The cabinet frames are complemented by open and closed wall units. These can be used as storage space, a bookcase or as a decorative surface.

SURFACES.

The cabinet frames and fronts have an outer layer that is 4 mm thin. These form the surface of Ameno, giving the furniture its unmistakable elegance. The covers are available in many different innovative materials and colours which can be combined as desired. Choose from over 2000 glass colours, glossy or satinised (matte), along with four ceramic tones and three wood colours. The fabric speaker covers come in three colours.

HIGH-QUALITY MATERIALS.

Glass surfaces are many times harder than traditionally coated surfaces. The ceramics are even harder and virtually non-scratchable. The wooden layers have a strong aluminium core. The wood veneers are laminated to the aluminium core in wafer-thin layers.

CONFIGURATION IN JUST SEVEN STEPS.

Ameno is easy to configure.

Using a special planning software, your dealer configures your Ameno entirely how you wish in 3D.

1. COMBINING CABINET FRAMES

Combine the cabinet frames together to get the desired size. Cabinet frames for integrating media come equipped with the "backbone" for cable and power management.

2 cabinet frame depths: 384 and 525 mm

5 cabinet frame widths: 315–1575 mm, width of each section 315 mm

10 cabinet frame heights: 210–890 mm, height of each section 210 mm

2. COMBINE FRONTS

You can arrange the fronts of the cabinet frame as desired.

5 front widths: 315–1575 mm, width of each section 315 mm

11 front heights: 105–890 mm, height of each section 105 mm

3. CHOOSE THE EQUIPMENT BEHIND EACH FRONT

Fronths can be designed as a flap, drawer a hinged door or speaker unit.

(Not all front sizes are available with all the functions.)

4. CHOOSE ARRANGEMENT

on the wall, standing or free-standing.

(With the free-standing version, the back comes with decorative covers.)

5. CHOOSE WALL CABINETS

Open and closed wall units can be selected for wall combinations .

6. CHOOSE MATERIAL AND COLOUR

Choose from 2,000 glass colours, glossy or satinised (matte),

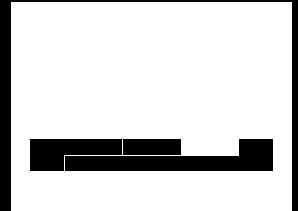

4 ceramic tones and 3 colours of wood or aluminium.

The speaker cover fabric is available in 3 colours.

Each cover can be individually designed.

7. CHOOSE ADDITIONAL FEATURES

3 sound systems, 360° universal TV mount, electric-powered drawers, docking solutions for Apple or Samsung mobile devices, power strip, drawer dividers, infra-red link system, adapter for wireless signal transmission,
