FIRST THINGS FIRST

Sometimes you have to set priorities – in your private as well as your professional life.

Admittedly: This is something it took us time to learn too. Because when we started creating our very first designs in the proverbial garage workshop, we got sidetracked all too often by unimportant issues.

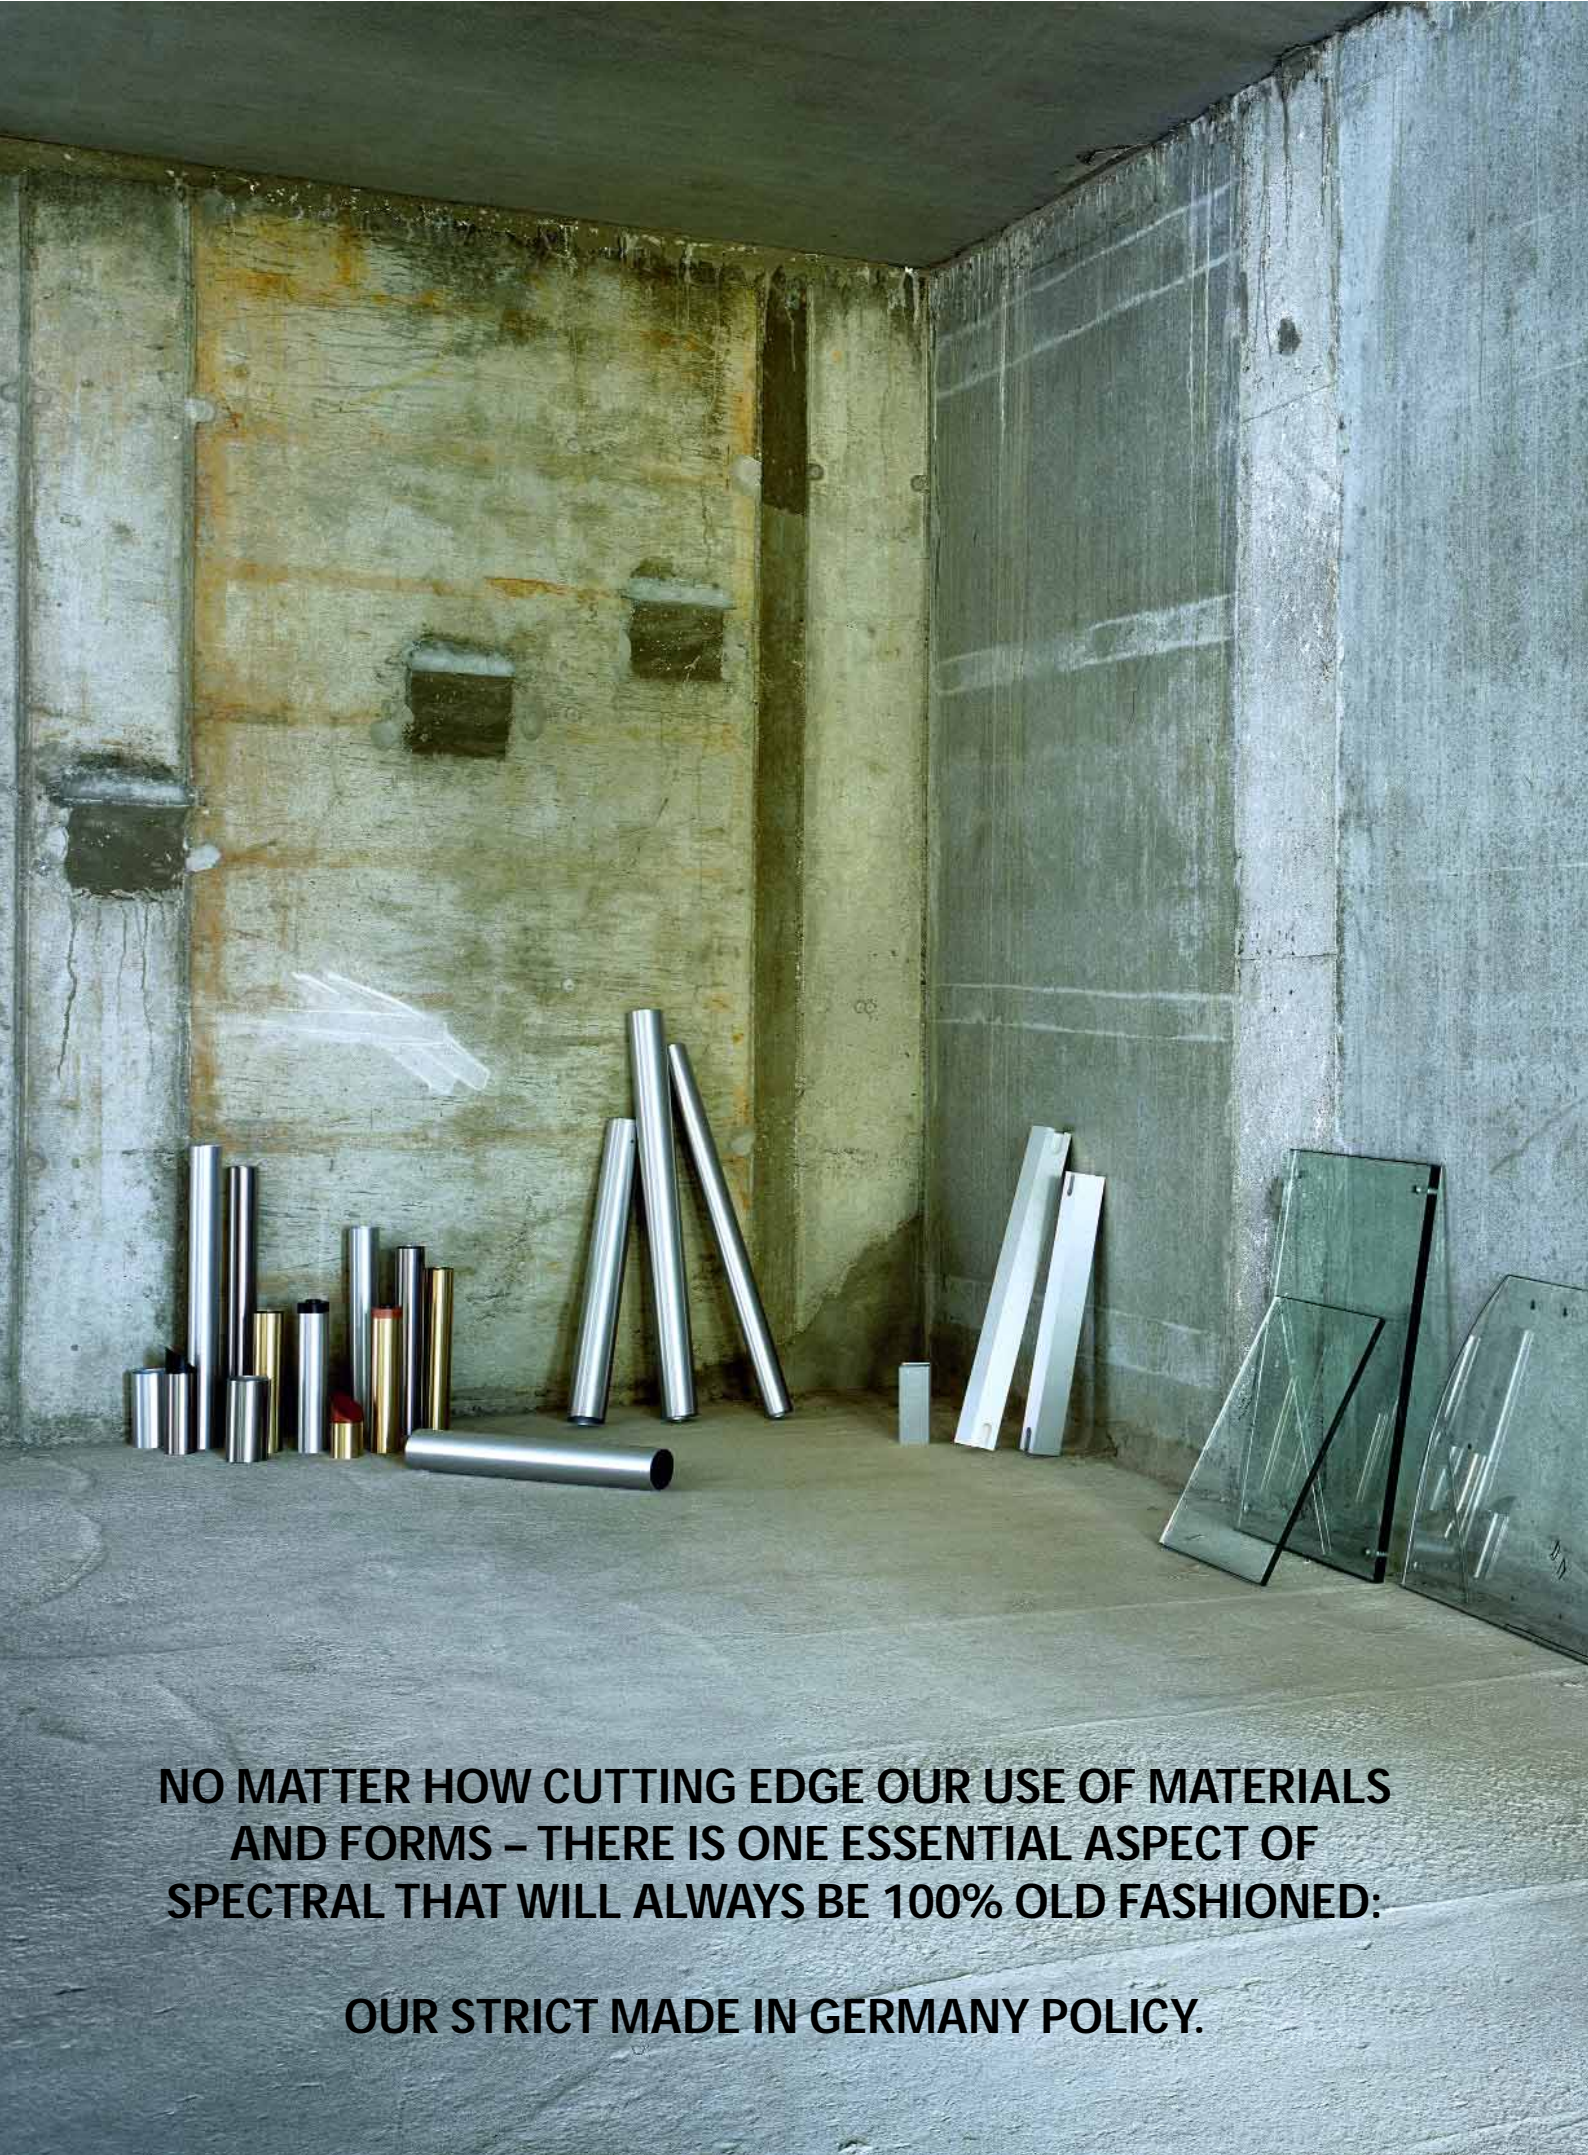

So it was some time before we had our first Spectral furniture series ready for market. Today, our production base in Bietigheim, Southern Germany, manufactures for satisfied customers around the world.

But for all the headlong growth, what has always stayed with us, apart from our shared love of hand crafted quality, is the lesson we learned from our father. By urging us to "work, not talk," he instilled in us all those values which have given us the strength and single-minded determination to succeed.

What you are holding in your hands is the fruit of our labours – our catalogue 2006: containing a wide range of new products alongside plenty of Spectral classics – all of them worthy of taking centre stage in furnishing your home.

It only remains for us to wish you all the best in "doing everything right from the very start"

Frank, Heiko and Markus Krämer – the three founders and Managing Directors of Spectral

**NO MATTER HOW CUTTING EDGE OUR USE OF MATERIALS
AND FORMS – THERE IS ONE ESSENTIAL ASPECT OF
SPECTRAL THAT WILL ALWAYS BE 100% OLD FASHIONED:**

OUR STRICT MADE IN GERMANY POLICY.

GLASS

Our shelves come in a choice of three different glass types: Clear, frosted and black. The glass edges and facets come with a brilliant polish. We use 8 – 15 mm thick toughened safety glass capable of supporting even heavy TV sets. Although the specified load bearing limits should not be exceeded, their actual ultimate breaking load is at least twice as high. To eliminate disturbing vibrations, all shelves are firmly braced into the construction and all glass-to-metal joints are bonded using transparent high-strength UV adhesive.

METAL

In selecting the metal qualities we use, we work according to the principle that only the best is good enough. As a result, we are one of the few furniture manufacturers who used exclusively non-rusting metals: You can choose between aluminium, brass and stainless steel (V2A). All metals used are ground using a complex multiple-stage grinding process and coated with an invisible surface sealant to protect the surface from dirt and fingerprint marks.

WOOD

Top and base sections are turned from finest quality solid wood. Plinths are made of quality veneered multiplex (multiple-ply) wood. All woods are sealed with several coats of clear varnish to provide the very best possible protection against bumps and scratches.

**AS UNIQUE AS YOUR EXPECTATIONS:
YOUR OWN INDIVIDUAL FURNITURE FROM SPECTRAL.**

The configurator

The convenient way to configure your furniture just the way you want it.

The Closed, High-End, Screen, Straight, Sideboard, Corner and Konkav product lines can be assembled precisely according to your needs.
Simply use the relevant configurator.

THE ORDER NUMBER CODE

With over a thousand combination possibilities available, there is practically no customer request we can't satisfy. And because each of our individually crafted pieces is something uniquely special, we give it a dedicated code number of its own. What it tells you about the furniture is explained here.

**PURISM ON PRINCIPLE!
OR AS ALBERT EINSTEIN PUT IT:**

**THE BEST DESIGN IS THE
SIMPLEST ONE THAT WORKS.**

MOVE

The purist Move model is the elemental sideboard for standard TV sets and plasma displays.
And even Einstein would have found the hovering box elements a pretty stunning touch.

70/71 EXTRAS

Accessories: Vesa120 (100 x 200 mm) or Vesa200 (200 x 200 mm) adapter plate.

EXTRAS: FOR EXAMPLE ORIGINAL SPECTRAL GLOSS STRAIGHT OUT OF THE CAN.

EXTRAS

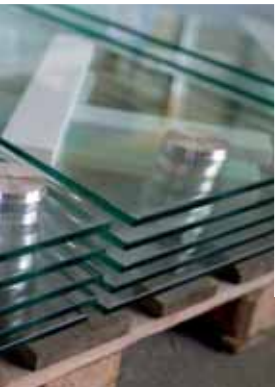

Given the now countless variety of models and fixtures for modern screens, finding the perfect solution can be an art in itself.

And even when everything does fit, we suddenly think of something else. Such as the original Spectral Spray. For original gloss straight out of the can.

**IT SOON COMES TO LIGHT
WHAT OUR COLLEAGUES HAVE IN
COMMON WITH ELVIS:**

**A LITTLE LESS CONVERSATION,
A LITTLE MORE ACTION.**

Having great ideas and being able to convert them into perfect prototypes is one thing. But series production of this furniture is a whole different challenge. A pretty tough one at that. This is where the strengths of our team shine through: where passion for creativity and production come as standard.

Having great ideas and being able to convert them into perfect prototypes is one thing. But series production of this furniture is a whole different challenge. A pretty tough one at that. This is where the strengths of our team shine through: where passion for creativity and production come as standard.

A low-angle shot of two street signs on a black pole. The top sign is white with black lettering and the bottom sign is black with white lettering. The background is a clear blue sky with a bright sun flare in the upper center and some wispy clouds at the bottom.
